

COLOUR MIX

Illustrated by
Aprilia Muktirina

Just three colours can make a whole lot more. They are called the primary colours. Red, blue, and yellow are primary.

Red is a strong,
powerful colour. We call
it a hot colour. Think of
hot, red things like lava.

Yellow is a warm colour,
too. It is more moderate.
Think of warm things like
the sun on a pleasant day.

Yellow

Blue is a cool colour.

Think of swimming in a
wonderful, clear blue lake.

So, how do you get more colours?

You mix those primary colours together.

Mix red and yellow, and you get...

Orange

Orange!

These two warm colours
make another warm colour
when they mix together.

Let's mix together red and blue.

I bet, you already know what colour
it will be.

purple

It's a great shade of purple!

When there is more red, it's a warm purple. When there is more blue, it's a cool purple.

Just one more pair to go.

Get yellow and blue together for
a party, and you create...

Green

Green!

It's usually a cool colour.

But add a lot of yellow to
warm it up.

And there you have it!

Mix the primary pairs
together, and you get
secondary colours.

So, what happens when
you mix all three at
once?

Awesome!

Mixing color
is fun!

S8

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page **www.bookbotkids.com/free-books** from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at **www.bookbotkids.com**.
