If Dinos Did Not Die...

There were a lot of
dinos on the earth long
ago. We have found
their bones.

For a brief time, let's say that dinos
did not die...

Just like how we see birds at the park,
there would be dinos on the slide and
swings.

Or would they be smart and live by our side?

Would they go to the shops and
choose what to buy?

Or would they break the
things that we have made?

Would they stomp out on fields and make games come to a halt?

If they found our food,
there would be none left.

In fact, they would go all through our homes and take our things.

The whole world would be a mess!
We could not live like we do now.

Dinos are cool, but the chief
thing to take from this is that
we could not live side by side.

But we can wield tools and toys that can tell us what dinos and their world was like.

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page **www.bookbotkids.com/free-books** from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at **www.bookbotkids.com**.
