

NOT THE SAME

illustrated by
Vannia Rizky

One has fuzz.

One does not.

They both have a
lot of legs.

An illustration of a forest scene. In the upper left, a small, colorful caterpillar with a yellow head, large black eyes, and a body with blue, red, and white segments is crawling on a brown tree branch. In the lower right, a larger, green caterpillar with yellow stripes and red spots is crawling on a similar branch. The background is a soft, light blue sky with faint, stylized green hills. The foreground and background are filled with green leaves and small pink flowers.

They are short.

That one is not.

They like the
same snacks.

They both eat a lot.

An illustration of two caterpillars on a tree branch. The caterpillar on the left is orange with blue and white patterns and a red and blue beaded necklace. The caterpillar on the right is green with white spots and orange feet. They are both looking towards the right. The background shows a brown tree trunk, green leaves, and pink flowers.

They both must
have a rest.

They make homes,
but they are not
the same.

One is spun from silk.

One is hard.

As they come out,
they must dry.

Then they can fly!

They are not up at
the same time.

They both lay eggs.

Some parts are
the same, but
not all.

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page **www.bookbotkids.com/free-books** from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at **www.bookbotkids.com**.
